Gem ‘AI’ Agents | TA

January 2026

ocado GROUP

What is a Gem?

A Gem is a structured AI workflow

The thinking is done once, so you don't have to prompt every time.

Industry research shows...

88% of TA professionals are using AI.....

Only 5% are using it to full capacity

Why use a Gem agent?

⚡ Inefficient AI use

Teams spend time re-prompting AI for the same tasks, leading to wasted effort and inconsistent results.

🎯 Output is prompt-dependent

Without a structured approach, quality varies hugely from person to person and task to task.

🔁 No repeatable workflow

We lack a standardised, shared AI process that the whole team can rely on and build from.

✅ Standardisation wins

Consistent quality every time, quickly.

What this enables...

AI supports the process. Humans remain accountable for every hiring decision.

⚡ Consistent hiring quality across teams

We're moving away from 'tech/prompt' individual excellence to an organisational guarantee of quality across every Ocado recruitment stream.

🎯 Acceleration

Small reductions in admin drag at each stage compound into faster hiring outcomes

✅ Operational Advantage

Moving from individual AI experimentation to a shared organisational standard.
