

Gem 'AI' Agents | TA

Updated May 2026

What is a Gem?

A Gem is a structured AI workflow

The thinking is done once, so you don't have to prompt every time.

Industry research shows...

88% of TA professionals are using AI.....

Only 5% are using it to full capacity

Why use a Gem agent?

Inefficient AI use

Teams spend time re-prompting AI for the same tasks, leading to wasted effort and inconsistent results.

Output is prompt-dependent

Without a structured approach, quality varies hugely from person to person and task to task.

No repeatable workflow

We lack a standardised, shared AI process that the whole team can rely on and build from.

Standardisation wins

Consistent quality every time, quickly.

Example Agents from the Suite...

CV Rank Agent

C

Blind ranks candidates against the JD using RAG + Gold scoring. Gives you an immediate view on the candidate's you've sourced

Pre Hiring Manager Intake Agent

R

Turns messy briefs into structured hiring plans and inserts a 3-stage interview scorecards instantly (for you to administer)

Interview Feedback Agent

I

Synthesises multi-interviewer notes with comparison. It will generate a Pass or Reject recommendation with a draft email

Candidate Screening Agent

C

Converts rough recruiter notes into high-signal candidate summaries. Option to email Hiring Manager

MarketMap Agent

M

Generates 50–80 target companies with persona views and add LinkedIn Boolean searches anchored to role and location.

Reach-Out Generator Agent

R

Creates concise, engaging LinkedIn outreach messages. Based on a 38% response rate. Ready-to-send in seconds

The Gem AI Workflow

Insert JD

3

Engage Talent

Reach-Out Agent
Insert JD

4

Assess & Screen

CV Rank Agent
Insert JD + Candidate PDF

Pre Screening Agent
Insert candidate CV

*Recruiter Screening
Agent*
Insert candidate screening notes

*Monthly Net to Annual
Gross Agent*
Insert candidate monthly gross

*Monthly Gross to Annual
Gross Agent*
Insert candidate monthly gross

5

Make the Decision

Interview Feedback Agent
Insert interviewer feedback

Onboarding Agent
Insert candidate name

*Recruitment
Performance Analysis
Agent*
Insert XLS Data

What this enables...

AI supports the process. Humans remain accountable for every hiring decision.

Consistent hiring quality across teams

We're moving away from 'tech/prompt' individual excellence to an organisational guarantee of quality across every Ocado recruitment stream.

Acceleration

Small reductions in admin drag at each stage compound into faster hiring outcomes

Operational Advantage

Moving from individual AI experimentation to a shared organisational standard.

Next Steps... ?

AI supports the process. Humans remain accountable for every hiring decision.
